DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 and 28, drawn to a method of operating a laundry machine where the laundry is rinsed at least once when the washing is finished.

Group II, claim(s) 9-14, drawn to a method of operating a laundry device where the laundry is rinsed at least once when supplying steam to sterilize the laundry is finished.

Group III, claim(s) 15-21 and 27, drawn to a method of operating a laundry device where the laundry is rinsed at least twice with cold and warm water, alternatively when the intermediate spinning is finished.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The shared technical feature of Groups I-III is the steps of: supplying washing water to the tub or drum; washing the laundry while rotating the drum; and spinning the laundry by rotating the drum after rinsing.

3. Jeon et al. (US 6,401,284) teaches that it is known in the prior art to supply washing water to the drum, to wash the laundry while rotating the drum, and to spin the laundry by rotating the drum after rinsing (col. 1, lines 26-56). Because the shared technical features of Groups I-III are taught by they prior art, they do not constitute a special technical feature, and therefore, Groups I-III lack unity of invention.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1792

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
